DEMETRIUS HOLMES

VISUAL GUIDE

PROPOSED — AWAITING APPROVAL

This system is proposed, not yet adopted as the approved standard. Build to the values on these pages. Do not substitute other shades, pairings, or typefaces.

One system, specified tightly enough to hand to any designer, editor, or developer: blue and gold — a deep blue, a slate blue for range, one disciplined muted gold, and warm ivory. Deep blue, muted gold, and warm ivory were direction suggestions; no shade is an approved standard until Demetrius adopts it.

Color palette — use these exact values

PRIMARY

Deep Ink

`#17242F`

Headlines, covers, banners, primary surfaces. The color of authority in the system.

SECONDARY

Harbor Slate

`#44586B`

Supporting panels, section labels, charts, secondary surfaces. Corporate range without coldness.

ACCENT — ON DARK ONLY

Holmes Gold

`#C2A059`

Rules, the monogram, key words, one highlight per surface. On dark backgrounds only. Never a gradient, never foil effects.

ACCENT — ON LIGHT, FOR TEXT

Deep Gold

`#7C5A10`

The same gold, darkened to stay legible on paper and white. Use for text: labels, small caps, links, the monogram on documents.

BACKGROUND

Warm Paper

`#F6F2EA`

Default page and document background. Warmth lives here, not in decoration. Pure white #FFFFFF for dense documents and data.

TEXT

Body and Secondary Text

`#17242F` `#3D4A57`

Body text is Deep Ink #17242F. Secondary text #3D4A57 is for captions, metadata, and supporting lines only. No light-gray body text, ever.

Accessible combinations — the only pairings

Proposed pairings, awaiting approval. Use no pairing outside this table without a contrast check.

TEXT	ON	CONTRAST	RATING	USE
Deep Ink #17242F	Warm Paper #F6F2EA	14.14 : 1	**AAA**	Default body text
Deep Ink #17242F	White #FFFFFF	15.79 : 1	**AAA**	Documents, data pages
Warm Paper #F6F2EA	Deep Ink #17242F	14.14 : 1	**AAA**	Covers, banners, dark panels
Secondary Text #3D4A57	Warm Paper #F6F2EA	8.12 : 1	**AAA**	Secondary text, captions
White #FFFFFF	Harbor Slate #44586B	7.36 : 1	**AAA**	Slate panels and headers
Harbor Slate #44586B	Warm Paper #F6F2EA	6.59 : 1	**AA**	Labels, subheads on light
Holmes Gold #C2A059	Deep Ink #17242F	6.37 : 1	**AA**	Accent words and rules on dark — never below 14px bold
Deep Gold #7C5A10	Warm Paper #F6F2EA	5.65 : 1	**AA**	Accent text on light

Hard rules: Gold never carries body text on a light background. No text on photography without a deep blue overlay at 80% or stronger. No color pairing outside this table without a contrast check.

Typography — one typeface throughout

Century Gothic carries headings and body alike. Hierarchy comes from weight, size, and tracking — never from a second display face, and no serif heading font is introduced anywhere in the system.

WORDMARK / DISPLAY Century Gothic Bold Tracked +0.14em, uppercase	**DEMETRIUS HOLMES**
H1 — PAGE TITLES Century Gothic Bold, 30-40px	**Bringing visions to life**
H2 — SECTION HEADS Century Gothic Bold, 20-24px	**Executive capability, in public**
LABEL / KICKER Century Gothic Bold, 12px Tracked +0.2em, uppercase Deep Gold or Slate	BUSINESS OPERATIONS
BODY Century Gothic Regular 16-17px, line-height 1.55	Judgment, resourcefulness, and follow-through: the work is specific, the numbers are verified, and the voice stays warm without ever getting loud.
PULL QUOTE Century Gothic Regular Italic 20-26px	*Real conversations. Real clarity about the next best move.*

The stacks — for the web build

- **Headings and body:** "Century Gothic", Montserrat, Futura, "Trebuchet MS", sans-serif — one stack for everything, so a document looks the same in Word, a deck, or a browser.
- **Default substitute:** Montserrat. Where Century Gothic is unavailable — Canva, Google Docs, most web interfaces — Montserrat steps in for both headings and body.
- On any machine without Office or the substitute loaded, text falls back to Futura (macOS) or Trebuchet MS with no layout break. The system is designed to survive its fallbacks.

Availability and licensing, stated plainly

- **Century Gothic** is a Monotype font bundled with Microsoft Office and Windows. It cannot be embedded or redistributed freely, and it is not offered in Canva or Google Docs — which is exactly why a verified substitute is specified. For the website, load Montserrat and let Century Gothic lead where a visitor already has it.
- **Montserrat, Poppins, and Raleway** were evaluated for that role. All three are open-licensed (SIL Open Font License), distributed through Google Fonts, and available in Canva, Google Docs, and Google Slides.
- No per-seat cost for any substitute: free in documents, decks, and web.

The substitute, demonstrated

Century Gothic is the standard. Montserrat is the recommended default substitute — the closest geometric match in proportion and weight, and the most widely available of the three. Poppins reads rounder and more casual; Raleway reads lighter and more fashion-leaning. Both stay on record as alternates, not defaults.

TYPEFACE	ROLE	SPECIMEN
Century Gothic	The standard	DEMETRIUS HOLMES — Business Operations
Montserrat	Recommended default substitute	DEMETRIUS HOLMES — Business Operations
Poppins	Evaluated alternate	DEMETRIUS HOLMES — Business Operations
Raleway	Evaluated alternate	DEMETRIUS HOLMES — Business Operations

Name treatment and monogram

DEMETRIUS HOLMES

BUSINESS OPERATIONS · LOS ANGELES

The name is the logo. Full name, always — never shortened, never a nickname, never stacked. Uppercase with wide tracking for display; title case in running text.

DH

The DH monogram earns its place where the full name cannot go: avatars, favicons, slide footers, watermarks on photography. Interlocked initials in a thin gold rule — a signature, not a crest. It never replaces the name on a cover or a document.

Layout principles for the build

- **One idea per surface.** A cover says one thing; a page argues one point.
- **Space is the luxury.** Margins at least 6% of width; sections separated by air, not boxes.
- **8-point spacing scale:** 8 / 16 / 24 / 40 / 64. Nothing sits at an in-between distance.
- **Left-aligned, always.** Centered text is reserved for the wordmark lockup alone.
- **Three graphic elements, total:** the 3px gold rule under titles, the DH monogram, and the thin hairline divider.
- **Square corners** on panels and frames — architectural, not app-like.
- No gradients, no shadows for decoration, no stock icon sets. If an element does not carry meaning, it comes out.

CSS variables — drop in as written

```
:root {
  --dh-ink: #17242F;        /* Deep Ink - primary */
  --dh-ink-soft: #3D4A57;   /* secondary text */
  --dh-slate: #44586B;      /* Harbor Slate - secondary */
  --dh-gold: #C2A059;       /* Holmes Gold - accent on dark */
  --dh-gold-deep: #7C5A10;  /* Deep Gold - accent text on light */
  --dh-paper: #F6F2EA;      /* Warm Paper - background */
  --dh-white: #FFFFFF;
  --dh-font-head: 'Century Gothic', 'Montserrat', Futura, 'Trebuchet MS', sans-serif;
  --dh-font-body: 'Century Gothic', 'Montserrat', 'Segoe UI', Helvetica, Arial, sans-serif;
  --dh-font-quote: 'Century Gothic', 'Montserrat', sans-serif; /* italic */
}
```

If a surface cannot meet the contrast table on page 2, it does not ship. Any new page or platform inherits this guide: same palette, same type, same rules.
